# About Us

## PROTECTING YOUR MOST VALUABLE ASSET YOUR PEOPLE.

### IPP (WA) OUR HISTORY

Under the current management Industrial Protective Products (WA) commenced on September 1st 1984.

Industrial Protective Products (WA) is a wholly owned Western Australian Company operating as a "true specialist safety house" supplying PPE, including footwear and clothing to the mining, construction and associated industries throughout Western Australia.

By operating through common sense principles Industrial Protective Products (WA) has grown to the strong position and status it currently holds within the industry in a very competitive WA market.

By focusing our efforts on this market, and operating under Worlds Best Practice we aim to ensure that initial relationships and short term agreements develop into long term alliances resulting in "win/win" outcomes for all parties.

### WHY CHOOSE IPP (WA)

- Specialist Personnel Protective Equipment Distributor, we stay with what we know.
- Western Australian Privately Owned and Operated.
- Service levels our customers expect. Pride in getting our job done the way you want it done.
- 24 Hour Support if required. You have access to the owner and upper level management.
- Long Term Relationships with our large customer base across many industries in WA.
- Experience: No other independent PPE distributor has the experience we have.
- We are flexible to your needs. We understand that not all of our customers are the same and ensure we listen to what makes you different.
- IPP has access to all major Local and Global manufacturers of Safety Equipment.

### THE IPP (WA) ADVANTAGE.

IPP(WA) in conjunction with our major manufacturers and principles offer an unparalleled and unbiased product range. With highly focused specialist advice and a range of support services designed we make the job of the safety specialist and buyer easier. IPP(WA) can tailor a Supply Management and Technical Support Service program to suit our customer / Alliance Partners specific requirements, complementing and enhancing existing safety and supply programs. Working together we will assist in reducing or eliminating those costs associated with purchasing and maintaining safety supply inventories. In short we make buying safety equipment easier so you can concentrate your efforts on core business practices.

### IPP (WA) OUR PEOPLE.

Industrial Protective Products (WA) continues its growth due to the strength of our staff. Due to the nature of the Personal Protective Products industry knowledge of product and our customers requirements is paramount to our success. We ensure that when our customers need help IPP staff are equipped with the knowledge and understanding to put the process in place to support them. Market leading customer service personnel and support staff lead to market leading customer service and at IPP(WA) we have both.

### IPP (WA) OUR SUPPLIERS.

IPP (WA) Only Promote and Support market leading products and suppliers. At IPP we ensure the products and support services offered by our supply partners reflect IPP quality standards, ethical practices and customer service ethos. Our preferred supplier list includes all major global and local corporations and smaller technical specialist product providers. Our relationships with our suppliers are long term. Many of which have used IPP as their preferred supplier in WA since their inception into Australia and Western Australia. Our supplier list includes but is not limited to the following, 3M, Steel Blue Footwear, Uvex, Bolle, MSA, Draeger, Ansell, Sundstrom, CoreControl, CleanSpace, Sensear, Prevor, Skylotec, Clipper, Moldex, Elliotts, GasClip, Oliver Footwear, Ironclad, ATG Gloves, Industree Group, Thorzt, Masterlock, Workit Workwear, Honeywell, Hexarmour gloves, Pratt Safety, Sqwincher, Mecdex, NXG. Together with our own range of imported product, supplier relationships and specialist product alliances IPP (WA) ensures that product performance and worker safety are ensured during the selection process.

### IPP (WA) ISO 9001 ACCREDITED.

While the company is justifiably proud of its specialist PPE commitment, of equal importance is its focus on quality. Industrial Protective Products (WA) is Quality assured to AS/NZS ISO 9001:2015 and a copy of our certification is available together with Certificate of Currency for indemnity. Today, its systems and procedures are all quality driven and this culture has been successfully fostered at all levels within the company. This level of after sales - service and back up has been a factor in IPP(WA) winning contracts with Mining, Chemical, Construction, Manufacturing and major public utilities around the Western Australia.

### IPP (WA) WESTERN AUSTRALIAN OWNED SINCE 1984.

IPP (WA) is a proudly Independent Western Australian owned company with in excess of years operation in its original location of Myaree. The proprietor of the business Joe Merillo has lived all his life in the Perth area and with his wife Elisma have played here at the highest level in a number of sports. All IPP staff reflect this loyalty to their state of birth with customers in WA our only concern as we only operate here. Our knowledge of this state and the rigorous demands on our customers reflect how we respond to their needs and demands. Our WA customers come first.

# Protective Clothing

**The emphasis on safety work wear has evolved significantly in the past few years; previously, work wear was only worn by employees of companies who had a progressive view of protecting their staff. Those times have significantly changed and compliance with high visibility safety garments is now standard practice for many workplaces.**

In addition to the focus on developing high visibility garments has been the trend to create work wear that is also fashionable and comfortable, however ensuring the employee remains safe and protected remains paramount and as a result there has been an update to the Australian and New Zealand Standard for high visibility garment materials and manufacture which was released in early 2011.

## **\*AS/NZS 4602.1:2011**

High visibility safety garments

### **Part 1: Garments for high risk applications**

This Standard specifies the visual requirements for high visibility safety garments for occupational wear by people who may be exposed to the hazard of moving traffic, moving plant or equipment in high risk situations. The Standard covers garments suitable for daytime wear, night-time wear where they will be seen by retro reflected light or for wear under both conditions but excludes garments for use by fire services.

\*The current standard AS/NZS 4602.1:1999 will expire in August 2012, after which AS/NZ 4602.1:2011 will come into effect. Any garment produced, sold, distributed or worn prior to August 2012 will still comply with AS/NZS 4602.1:1999.

### **What Are The Key Changes?**

The 2011 Standard contains a more rigorous specification regarding the amount of high visibility material required on a garment for daytime visibility in high risk applications and the way it is to be measured. Some of the key changes include;

- Size of underarm ventilation needs to be a maximum of 100mm width x 100mm in length
- There must be 0.2m<sup>2</sup> of high visibility material on the front and on the back of a garment to comply with day class for all work wear
- Small sizes where 0.2m<sup>2</sup> of high visibility material on the front and on the back of an upper or full body garment is not achievable, the garment must have high visibility fabric on the sleeves
- Labelling will include prominent and additional care instructions

## **AS/NZS 1906.4:2010**

Retro reflective materials and devices for road traffic control purposes Part 4: High-visibility materials for safety garments

This Standard specifies the photometric, colorimetric and physical property requirements for high-visibility materials for outdoor daytime use, or retro reflective materials for use at night or in other dark conditions to be used for the manufacture of, or for incorporation into industrial safety garments designed to be worn in situations where the wearer needs to be highly visible. Immersible water safety materials such as those used on personal flotation devices are not included.

At the time of publishing, the industry was in a transition period where both old and new standards were accepted, as a result there are references to both old and new standards. Industrial Protective Products will be working closely with our suppliers to ensure our garments comply with the new standard on its introduction.

Please contact Industrial Protective Products regarding any queries you may have about high visibility compliant safety garments.

## **AS/NZS 4399:1996**

Sun protective clothing - Evaluation and classification

This Standard sets out requirements for determining the rated ultraviolet protection factor of sun protective textiles, garments and other items of personal apparel (such as hats) which are worn in close proximity to the skin. It also specifies appropriate detailed labelling requirements. It does not cover sunscreen products for topical application to the human skin, fabrics for architectural or horticultural use such as shade cloth, sunglasses or items which offer protection at a distance from the skin, such as umbrellas or shade structures. It does not cover protection from ultraviolet radiation sources other than the sun.

### **Embroidery**

We can arrange to have your work wear embroidered with your logo.

Combining the latest technology with personal and professional service, we can provide you and your business with custom embroidery of your work wear.

- Elasticised waist

### PC WK RSHV HI-VIS RAIN SUIT

- PVC/Polyester with elastic cuffs plus studs.
- Two large pockets.
- Hood with drawstring.
- Sold and packaged individually.
- S - 5XL
- Orange, Yellow
- PVC/Polyester

FLAME RESISTANT

# FLAME RESISTANT PROTECTION

Everyday work clothes can ignite, burn or melt when exposed to electric arc flash, flash fires or other heat-related hazards.

The extent of a burn injury can be substantially reduced if wearing the correct FR garments. Be sure to know the standards before selecting the product required for your work environment.

## ARC FLASH PROTECTION

**NFPA 70E: STANDARD FOR ELECTRICAL SAFETY IN THE WORKPLACE**

This standard defines the guidelines for Electrical Safety in the Workplace. It addresses the electrical safety requirements for employees in the worksite, such as safe work practices and PPE (Personal Protective Equipment), which includes arc rated clothing based upon the incident energy associated with the specific task. An arc flash heat can achieve high temperatures, so the standard's categories of hazard (rank PPE1 to PPE4) are directly related to the level of protection.

To define the level of protection that an FR fabric provides, the material needs to be tested following the ASTM F 1959 Standard. This test defines the ATPV (Arc thermal performance value) which indicates the level of protection provided by the FR fabric. The higher the number, the greater the protection.

ENA NENS 09-2014:	PPE1		ATPV minimum 4 cal/cm <sup>2</sup>	PPE2		ATPV minimum 8 cal/cm <sup>2</sup>
	PPE3		ATPV minimum 25 cal/cm <sup>2</sup>	PPE4		ATPV minimum 40 cal/cm <sup>2</sup>

This is a guideline for the selection and maintenance of PPE for electric arc hazards. While not a standard, this has been set up by The Energy Networks Association (ENA) to provide a comprehensive guide to minimum levels of PPE required to protect workers against electrical hazards in Australia.

## FLASH FIRE PROTECTION

**NFPA 2112: STANDARD ON FLAME-RESISTANT GARMENTS FOR PROTECTION OF INDUSTRIAL PERSONNEL AGAINST FLASH FIRE**

This standard defines the guidelines for Flame Resistant Garments for Protection of Industrial Personnel Against Flash Fire. It specifies the minimum performance requirements, test methods for flame-resistant fabrics and components, designs, and certification requirements. indicates the level of protection provided by the FR fabric.

**PC WK 3101 VESTAS PPE3 Inherent FR 3 Layer Wet Weather Taped Jacket**

- Front fob and side hand warmer pockets.
- Storm flap closure with FR Prym Studs - No Velcro throughout for AS qualities.

- 50+ UPF rated fabric
- Soft toweling sweatband
- Releasable back panel for improved ventilation

**Glo-safe Navy Proban® Snood with Drawstring**

**PC GUA PP640102NC**

- Hoods manufactured from lightweight Proban® Cotton drill
- Extended length to cover shoulders
- Sewn in Aramid Thread
- For use with light to moderate welding only

**Glo-safe Nomex® Balaclava**

**PC GUA NP640014** - Open Face  
**PC GUA NP640014EH** - Individual Eye Holes

- Nomex® plus FR Viscose
- Double Layer Knit
- Suitable for structural and bush fire fighting
- Complies with NFPA 1971-97 ISO 11613 Clause 6

**Glo-safe Proban® Welders Jacket**

**PC GUA PP64104N** - Navy

**PC GUA PP64104O** - Orange

- Manufactured from Proban® Cotton drill
- Comfortable alternative to chrome leather
- Sewn in Aramid Thread
- For use with light to moderate welding only
- Sizes: Sm - 5XL

**Glo-safe Proban® Welders Jacket with Leather Sleeves**

**PC GUA PP64108N** - Navy

**PC GUA PP64108O** - Orange

- Manufactured from Proban® Cotton drill
- Premium grade chrome leather sleeves
- Sewn in Aramid Thread
- For use with light to moderate welding only
- Sizes: Sm - 5XL

**GORE® chemical splash fabric.**

**PC GLA**

**GOR-CHEM**

Red Size S - 6XL

- Goretex Chemical Splash Fabric Overall
- Velcro adjustable cuff
- Seam sealed (waterproof)
- Heavy duty plastic zip
- Concealed hood

**Glo-Safe Shearguard Leather Furnace Coat**

**PC GUA SP801242**

- Shearguard is a treated leather that is flame retardant and heat resistant
- Full length coat used in foundry environments
- Sewn in double stitched Aramid thread for extra protection and strength
- Length: 160cm (can be easily cut shorter for size adjustment)

**Chrome Leather Welding Sleeves**

**PC IP LWSL**

- Premium quality chrome leather
- front and back yoke, press stud closure

**Chrome Leather Welding Jacket**

**PC IP LWJ** - Sizes - S to 4XL

Premium grade chrome leather  
Metal press stud opening (two rows)  
Sewn with Aramid thread  
Length: 760mm

**Also Available**

**Chrome Leather Welding Apron**

**PC IP LA1-LS**

- Premium quality chrome leather
- Leather belt and plastic side clip
- Reinforced strap attachments

**Chrome Leather Welding Spats**

**PC IP LSP-L** - Long

**PI IP LSS-8** - Short

- Two Sizes Ankle and Shin Length
- Touch tape fastening for quick release
- Elastic top for extra protection
- Minimal exposed seams on work areas
- Full boot coverage

# Disposable Clothing

European guidelines within the CE Complex category help users identify the correct garment for the task. This information enables you to decide which product is suitable for your use.

- Type 1 Gas tight clothing
- Type 2 Non gas tight clothing
- Type 3 Liquid tight clothing
- Type 4 Spray tight clothing
- Type 5 Particle protection
- Type 6 Limited splash protection
- PB[6] Partial body protection

To display the relevant Type Classification, as KIMBERLY-CLARK PROFESSIONAL\* does, the manufacturer must test the garment to accepted European norms and have these results validated by an external certification body.

## CE 0120 Assured

KIMBERLY-CLARK PROFESSIONAL\* has been accredited and or meets the CE mark of Complex design (Category 3) for its range of KLEENGUARD\*

Protective Apparel by SGS Weston-Super-Mare United Kingdom Certification Services Ltd (EC Notified Body Number 0120). This was achieved by satisfying the examiner that products and quality systems meet the levels required by EU legislation.

## KLEENGUARD\* Apparel Protection Level Symbols

KIMBERLY-CLARK PROFESSIONAL\* product identity system includes:

Standard symbols to indicate products meeting or exceeding the requirements of specific European standards.

- Multi-lingual user information
- Packaging to protect garments until use
- Technical service support

## Product selector

A comprehensive range of apparel products providing the most appropriate personal protection to meet your needs.

Selecting the correct Safety Apparel product for your particular circumstances can be difficult.

The following information may be helpful:

A71 are our chemical protective coveralls meeting EN 14605:2005 Type 3.

A20 are our EN 13034:2005 Type 6 & EN ISO 13982-1:2004 Type 5 offering.

A20 is an SMS product that provides high levels of comfort due to the breathability of the protective base-sheet.

Product	Test Method	A 20 High Levels of Comfort	A40 High Levels of Protection	A71 Chemical Protection
Type 3	EN 14605:2005			Pass
Type 4	EN 14605:205		Pass	Pass

Resistance to penetration by liquids	EN 368 (10% NaOH)	3	3	
Resistance to permeation	EN 374:3 (30% H2SO4)			6
Resistance to permeation	EN 374:3 (10% NaOH)			6

The selector is a guide only. It is the responsibility of the employer to make sure the apparel is suitable for its intended use. We suggest that you always check the latest version of KIMBERLY-CLARK PROFESSIONAL\* product literature to get more information about the prod

### Tychem® TK

Effective barrier against more than 300 chemicals for your peace of mind. Specifically developed to protect against toxic and corrosive gases, liquids and solid chemicals. Fabric, visor, inner layer glove and seams meet required resistance to permeation for chemicals listed in EN 943-2. Out of the 300 chemicals tested, no observable breakthrough in tests for 270 chemicals after 8 hours of exposure. Puncture- and tear-resistant.

Oil and gas

Emergency response

Chemical industry

Reference:	TYK GEVHD YL 00 (with socks) TYK GEVJD YL 00 (with boots)
Colour:	Lime yellow or Lime green
Size:	SM to 2XL (All sizes are MTO)

Category III TYPE 1a-ET

Option: hazmat chemical boots

Attached gloves

Gas-tight zip closure

### Tychem® 6000 FR ThermoPro

Single layer, triple-threat (chemical, thermal and electric arc) protection garments and accessories for 360° protection. Synergy of two unique and long-proven technologies from DuPont: Tychem® for the chemical protection and Nomex® for the heat and flame and electric arc protection. Protection against organic and inorganic chemicals. Tested for permeation against > 240 chemicals. Tested on DuPont™ Thermo-Man® thermal mannequin: up to 8% predicted body burn injury for an average of 98% chances of survival in case of a flash fire.

- Electric arc rating: ATPV = 15 cal/cm<sup>2</sup>.
- Single layer allowing a great scope of movement.
- Can be reused if not contaminated or damaged.
- Available also as combo solution: Bib-overall and jacket combination.

## Tychem® 6000 F FaceSeal

Tight design combined with trusted Tychem® protection.

- Tight design technologies: rubber seal around the mask offers good compatibility with full face mask and sealed in gloves for full body protection.
- No need for taping, enables faster donning in emergency situations and industrial applications.
- Rear entry with double flaps for enhanced safety of the wearer from frontal exposure.
- Attached dissipative socks with boot flap.
- Enables earthing of the wearer through dissipative shoes without need for additional earthing cables.
- Specially for emergency responder teams who may stock the garments for longer periods of time, the manufacturing date is featured on the box packaging.

## Tyvek® 500 HP

Solution for wearers needing chemical protection when working at heights.

- Protection of your fall arrest equipment / lanyard worn underneath while protecting the wearer at the same time thanks to the back pass-thru system and the hook & loop closure at the end.
- Protection of the worker thanks to the tight design through sealable chin flap & zipper flap, elasticated cuffs with thumb loops and snap closure system for the pass-thru.
- Design validated by a long series of mannequin fall tests.
- High level of comfort and mobility due to extremely light weight and the breathability of the Tyvek® fabric.
- Superior chemical protection and durability thanks to the unique Tyvek® fabric.
- Free of silicone, oil, grease, contaminates, foreign materials and surface irregularities (suitable for paint applications).

### BN Neoprene Apron BN-45

**PC AN BN-45** - Size 1 sizes for all  
The BN-45 is a black, supported Neoprene apron which offers protection against a wide range of chemicals. The BN-45 also offers superior abrasion resistance than unsupported aprons. The BN-45 Apron contains Neoprene which offers a broad spectrum protection from a wide range of chemicals. As a lightweight apron, the BN-45 also offers good mechanical resistance, i.e. abrasion resistance.

### Paliton Apron

#### PC AL 7103-GEL

Designed with large abrasion-resistant rubber cap, the silica gel insert cushions and protects the knee cap by dispersing pressure that can build from hours of kneeling. 3.75cm nylon reinforced elastic dual straps and Velcro closures, offer durability and stability, not to mention comfort and flexibility.

### Ansell Neoprene Sleeves BS-45

**PentaArmor® 1010 Sleeve**

**GL HX 1010** - sizes S to 3XL

The Latest Innovation in Arm and Body Protection from HexArmor®

Introducing the PentaArmor® 1010. It's now possible to increase arm safety by 800% and reduce costs by 50% with a product that is lightweight, breathable, and comfortable to wear.

- 8X the Cut Resistance of Kevlar®
- The new PentaArmor® 1010 with SuperFabric® has over 4200grams of cut-resistance\* as compared to 600 grams from Kevlar®, and an average of 800G with an HDPE composite.
- Lightweight Breathability
- The PentaArmor® 1010 consists of guardplates infused into a polyester shell, creating an armguard that is about as heavy as a t-shirt, without the scratchy feel of Kevlar®, but retains the breathability for a cool feel.
- Launderable and Durable
- Through current testing, the PentaArmor® 1010 arm sleeves are lasting on average 26+ weeks compared to 1.5 weeks with Kevlar® and 4 weeks for HDPE. Even after 30 weeks and multiple washings, the cut resistance was not compromised.
- Cost Effective
- Save up to 50% on your annual arm guard costs while increasing your protection!

EN 388  
4 5 3 2

**19" Arm sleeve as019s**

**GL HX AS109S** - sizes XS to 3XL

Competitive fabrics don't always cut it where protection is needed most. HexArmor® arm protection with SuperFabric® brand materials provide the highest levels of cut and puncture protection on the market, increasing arm safety and reducing PPE overall costs.

- Armor Up! No more snags, punctures, abrasions, or cuts to your arms and torso. HexArmor® arm protection exceeds the industry's highest testing standards - ISEA Level 5, giving you the protection you need most, where you need it. Our arm guards outperform, outlast, and fit more comfortably than the competition.
- SuperFabric® brand material provides ISEA Level 5 cut resistance and maintains the highest level of protection available in the industry
- Industrial puncture protection from wires, metal, wood, and glass
- Won't fall down like knit sleeves
- Neoprene thumb loop and sleeve clip keeps sleeve in place Launderable
